University of Duisburg-Essen, Mercator School of Management
Lotharstrasse 65, 47057 Duisburg, Germany

ACADEMIC POSITIONS

2022 - **Post-Doctoral Researcher**
University of Duisburg-Essen, Germany

2017-2022 **Research Assistant**
Centre de Recerca en Economia Internacional, Spain

EDUCATION

2017 - 2022 **PhD in Economics and Finance**
Universitat Pompeu Fabra, Spain

2016 - 2017 **Master of Research in Economics and Finance**
Universitat Pompeu Fabra, Spain

2015 - 2016 **Master of Science in Economics and Finance**
Barcelona Graduate School of Economics, Spain

2010 - 2015 **Bachelor of Science in Physics**
Specialization: Cosmology
Distribution Field: Economics
Bogazici University, Turkey

Teaching and Research Fields

Primary Fields: International Trade, Economic Geography, Urban Economics, Political Economy
Secondary Fields: International Finance, Growth and Development, Macroeconomic

PUBLICATIONS

"Exploring European Regional Trade", *with Marta Santamaria and Jaume Ventura*

***Abstract**: We use the new dataset of trade flows across 269 European regions in 24 countries constructed in Santamaría et al. (2020) to systematically explore for the first time trade patterns within and across country borders. We focus on the differences between home trade, country trade and foreign trade. We document the following facts: (i) European regional trade has a strong home and country bias, (ii) geographic distance and national borders are important determinants of regional trade, but cannot explain the strong regional home bias and (iii) the home bias is heterogeneous across regions and seems to be caused by political regional borders.*

RESEARCH PAPERS

"European Integration and the Rise of Superstar Cities"

Abstract: *Spatial inequality within countries is high and rising. This paper assesses how much the 2004 enlargement of the European Union contributed to widening disparities in economic performance across cities in Europe. I develop a quantitative open-economy model of economic geography in which market integration spurs city growth. Long-distance trade occurs through urban hubs and generates positive spillovers for their local consumption amenities. As a result, removing barriers to trade causes economic activity and population to concentrate closer to urban hubs. I show that empirical evidence bears out qualitatively the theoretical predictions of my model. Quantitatively, my structural estimates imply that greater market integration caused by EU enlargement accounts for 26% of the observed increase in residents of the major cities in Central Europe.*

"Borders within Europe", *with Marta Santamaria and Jaume Ventura*

Abstract: *Are country borders still an impediment to trade flows within Europe? Using a rich microlevel survey with 3 million annual shipments of goods by road across 269 European regions, we construct a matrix of bilateral trade flows for 12 industries from 2011 to 2017. We then use the causal inference framework to design an identification strategy to estimate the causal effect of country borders on trade flows. Take two similar region pairs, the first one containing regions in different countries and the second one containing regions in the same country. The market share of the origin region in the destination region for the international pair is only 17.5 percent that of the intranational pair. We refer to this estimate as the average border effect. When we look at each industry separately, we find border effects that range from 12.3 to 38.9 percent. When we look at recent borders, i.e. created after 1910, we find a border effect of 28.8 percent, which is smaller than the average border effect but still quite large. The implication is clear: Europe is far from having a single market.*

"Quantifying the Effects of Border Changes in Europe", *with Doruk Gokalp and Jaume Ventura*

TEACHING

2023 -	Topics in Development and Economic Growth, *University of Duisburg Essen*
2020-2021	Probability and Statistics, *Barcelona School of Economics*
2020-2021	Calculus and Linear Algebra, *Barcelona School of Economics*
2017-2021	International Trade and Finance (TA), *Barcelona School of Economics*
2019-2020	Trade policy and Int. Policy Coordination, *Barcelona School of Economics*
